

Bob Dittmar DVM

Bob began his participation in the HCDJLS in the late '60's-early 70's while growing up in Harper. He joined the general board in 1982 shortly after moving back to the Hill Country. One of his first jobs was helping Dr. Thomerson and Dr. Leifeste draw blood for psuedorabies testing on the swine.

Bob served for several terms on the Executive board and held several officer positions which included President and Vice President. During his time on the Executive Board, he helped set up the Trust Fund for the scholarship program, as well as the scholarship program for the breeding show divisions. He also assisted in developing a protocol for the drug testing program, and served on and chaired both the Sale and the Fundraiser committees. He currently assists with the drug testing and is an assistant superintendent on the breeding sheep committee.

When asked what he thought was his most important contribution, Bob answered, "The Trust fund and the Breeding Show Scholarships. It has been very rewarding for me to be able to contribute to programs like the stock show that meant so much to me growing up. They have helped me obtain whatever measure of success I have had in life and my career. It's a great honor to be recognized by an outstanding organization like this and the outstanding group of people that make it up."
